Bisen, Professor of Biotechnology, Jiwaji University and Chairman, Bisen Biotech and Biopharma, Gwalior, India

Molecular Diagnostics: Promises and Possibilities

Molecular diagnostics has become an important part of the clinical laboratory, with tests and methods to identify a disease and understand the predisposition for a disease by analyzing DNA or RNA. Molecular diagnostics offers a growth opportunity in utilizing molecular tools to precisely target therapeutics and the development of biochips, microfluidics technology and nanotechnology extends the limits of detection. Molecular Diagnostics can provide gene profile based personalized therapeutic approaches, and therapy based on this molecular diagnostic information delivers effective treatment with the least toxicity. In the future, the scope of molecular diagnostics in molecular medicine could be expanded well beyond current nucleic acid testing, and it will play an important role in medicine, public health, pharmaceuticals, forensics and drug discovery. 'Molecular diagnostics: promises and possibilities' covers: The identification of viable technology drivers through a comprehensive look at platform technologies for molecular diagnostics, including probe-based nucleic acid assays, microarrays and sequencing The most important molecular diagnostics tests: predictive, screening, prognostic, monitoring, pharmacogenomic and... *more on <http://springer.com/978-90-481-3260-7>*

2010. Approx. 250 p. Hardcover

- ▶ **129,95 €**
- ▶ **\$179.00**
- ▶ **SFr. 202.00**
- ▶ **£117.00**

ISBN 978-90-481-3260-7

- ▶ Details developments in the past decade that have changed the scope from molecular pathology to molecular diagnosis
- ▶ Covers the principles of molecular biology along with genomes and nucleic acid alterations, techniques, instrumentation, applications and market of molecular diagnostics
- ▶ Includes advanced molecular diagnostic techniques for genetic diseases, cancers, infectious diseases, and identity testing
- ▶ Covers current molecular biological techniques used to identify the underlying molecular defects in inherited disease
- ▶ Shows an improved understanding of the current state and future of the molecular diagnostics market

CA, MA, NJ, NY, and PA residents, please add sales tax. Canadian residents, please add 5% GST. Please add \$5.00 for shipping one book and \$1.00 for each additional book. Outside the US and Canada add \$10.00 for first book, \$5.00 for each additional book. All orders are processed upon receipt. If an order cannot be fulfilled within 90 days, payment will be refunded upon request. Prices are payable in US currency or its equivalent. Remember, your 30-day return privilege is always guaranteed. Pre-publication pricing: Unless otherwise stated, pre-pub prices are valid through the end of the third month following publication, and therefore are subject to change.

All € and £ prices are net prices subject to local VAT, e.g. in Germany 7% VAT for books and 19% VAT for electronic products. Pre-publication pricing: Unless otherwise stated, pre-pub prices are valid through the end of the third month following publication, and therefore are subject to change. All prices exclusive of carriage charges. Prices and other details are subject to change without notice. All errors and omissions excepted. Please consult springer.com for information on postage.
